BUSINESS ONLINE USER ROLES DEFINITION

The three Business Online user roles are described below in the order of their authority levels:

Administrators:

These users have the highest level of access to all accounts and functions. They will manage the Business Online access of the other users e.g. Issue/reset passwords, limit user access to particular accounts and functions and register mobile phone numbers of other users.

Authorisers:

These users can authorise transactions through Business Online based on your Business Online authorisation rule.

All Administrators are automatically Authorisers as well.

Creator/Viewers:

These users can only create or view transactions but not authorise them. The users are created and managed by the Administrators once your Business Online is established.

Important: All new authorisers, by default, have full access to accounts and transactions. If necessary, an Administrator can remove their access to specific accounts and functions.
