

# Westpac Retirement Plan

## Balanced Portfolio

### Fund Update for the year ended:

**31 March 2023**

This fund update was first made publicly available on 30 June 2023.

#### What is the purpose of this update?

This document tells you how the Balanced Portfolio has performed and what fees were charged. The document will help you to compare the fund with other funds. BT Funds Management (NZ) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

#### Description of this fund

The Balanced Portfolio aims to provide medium returns over the medium to long term. The Balanced Portfolio has a higher target allocation to growth assets than to income assets. Volatility is expected to be higher than the Accumulation Portfolio but lower than the Dynamic Portfolio.

Total value of the fund	\$ 67,840,831
Number of investors in the fund	2,097
The date the fund started	18 March 1980

#### How has the fund performed?

	Average over past 5 years	Past year
<b>Annual return</b> (after deductions for charges and tax)	2.91%	-3.65%
<b>Annual return</b> (after deductions for charges but before tax)	3.14%	-3.98%
Composite of market index annual return (reflects no deductions for charges and tax) and peer group index annual return (after deductions for charges but before tax) <sup>2</sup>	4.94%	-2.48%

The market index return used from 29 September 2021 and the composite market and peer group index used prior to this date reflect a composite of benchmark index returns, weighted for the fund's target asset allocation. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Effective from 21 June 2022, there has been a change to the underlying market index for Australasian equities, an asset class included in the market index. This change occurred so that the market index was more reflective of the underlying assets of the asset class.

Additional information about the market index and the peer group index is available in SIPO on the offer register at [disclose-register.companiesoffice.govt.nz](https://disclose-register.companiesoffice.govt.nz).

#### What are the risks of investing?

Risk indicator for the Balanced Portfolio.<sup>1</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz/tools/investor-profiler](https://sorted.org.nz/tools/investor-profiler)

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 31 March 2023. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

## Annual return graph<sup>2</sup>

This shows the return after fund charges and tax for each of the last 10 complete years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 31 March 2023.

**Important:** This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Balanced Portfolio are charged fund charges. In the year to 31 March 2023, these were:

	% of net asset value
<b>Total fund charges<sup>3</sup></b>	<b>1.60%</b>
Which are made up of	
<b>Total management and administration charges</b>	<b>1.60%</b>
Including -	
Manager's basic fee	1.45%
Other management and administration charges	0.15%
<b>Total performance-based fees</b>	<b>0.00%</b>
<b>Other charges</b>	<b>\$ amount per investor</b>
Other Charges	\$0.00

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Jason had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jason incurred a loss after fund charges were deducted of -\$365 (that is -3.65% of his initial \$10,000). Jason did not pay anything in other charges. This gives Jason a total loss after tax of -\$365 for the year.

## What does the fund invest in?

This shows the types of assets that the fund invests in.<sup>4</sup>

### Actual investment mix<sup>5</sup>

### Target investment mix

Cash and cash equivalents	4.00%

## Further information

You can also obtain this information, the SIPO for the Westpac Retirement Plan, and some additional information from the offer register at [disclose-register.companiesoffice.govt.nz](https://disclose-register.companiesoffice.govt.nz).

## Notes

1. The risk indicator for the fund is calculated based on the volatility of returns over the past five years, which may not be a full investment cycle. In some cases the risk indicator might differ if calculated using a longer timeframe. We believe an average investment cycle is generally considered to be a period of between 7 to 10 years. If the period of returns data that a risk indicator is based on has had unusually low or high volatility the risk indicator presented in a fund update may provide a less reliable indication of a fund's potential future volatility.
2. The return on the composite index, which was used up until 28 September 2021, has been used in the following ways, because there was no appropriate market index for the exposure to Other assets: in the How has the fund performed? table, and in the Annual Return Graph Index bars, applicable from 1 April 2016. A composite index may be a less reliable indicator of performance than an appropriate market index. The return for the peer group index used in the composite index and reflected in the table and the bar graph is net of fund charges and trading expenses (if any) but before tax. Additional information about the market index and the peer group index is available in the SIPO on the offer register at [disclose-register.companiesoffice.govt.nz](https://disclose-register.companiesoffice.govt.nz)
3. The amounts specified include GST, where applicable.
4. For further information on each of the asset classes refer to the SIPO.
5. For the reporting of the Actual investment mix, cash and cash equivalents held for operational and hedging purposes at an asset class level (in the underlying funds) are assigned to the asset class to which they relate.
6. The top 10 investments have been calculated excluding cash and cash equivalents held for operational and hedging purposes.
